

## Flexible silencer with gasket (GDF)

### Description:

Highly flexible silencer with

- outer sheathing of seamed aluminium
- inner tube of perforated aluminium
- synthetic resin fibre-glass mat as damping material
- stable aluminum male end cap with gasket

<b>Medium temperature</b>	to 80°C
<b>Absorption material</b>	non-inflammable (EN13501) fire performance A1
<b>Standard packing thickness</b>	25mm but 50mm also available
<b>Standard lengths</b>	500, 1000mm but 750, 1500 and 2000mm also available

Pressure loss is respective to the distortion of the flexible duct. The pressure loss values of segmented bends can be applied. The calculated value is to be multiplied by 2.5 due to the higher roughness.
